

HRSG Thermowells & Sensors

Product Description

HRSG Sensors

Conax Technologies works with several OEM manufacturers of HRSG's providing sensors for Superheaters, waste water evaporators, High Pressure drum temperatures well as tube skin temperature measurement. These sensors, usually provided in type K or E conductor material are manufactured from ASTM E585 grade MI cable. Often times weld pads matching tube materials and radius are provided.

Tube Skin Sensor

HRSG Thermowells

One of the most important features in HRSG's is product life. Conax Thermowells are available in F21 and F22 alloys with full material certifications. Thermowells are designed with the ASME power test code as a guideline.
